

Miguel Delgadillo

AI Workflow Systems Builder | Sales Operations | Automation & LLM Integrations

San Diego, CA · goordo_m15@hotmail.com · 619-879-1609 · Portfolio: <https://miguel-ai-portfolio.vercel.app>

PROFILE

Practical AI workflow systems builder with hands-on experience in field-sales operations, CRM thinking, workflow automation, dashboard design, and AI assistant orchestration. Background includes administration, dispatch coordination, retail/direct sales, customer service, digital marketing, and youth program leadership. Builds operational tools that turn daily work into structured data, dashboards, and automation-ready workflows.

AI & AUTOMATION PROJECTS

Solar Field Sales Intelligence Tracker — Independent Personal Project

Mobile-first field-sales tracking app for retail solar workflow

- Built a personal sales operations tracker to log daily activity, customer engagement, roof conversations, pitches, leads, appointments, objections, sentiments, demographics, store location, and customer status.
- Designed dashboards for daily summary, daily goal progress, weekly averages, all-time summaries, stats graphs, and store/location filtering.
- Applied CRM thinking by structuring field conversations into records that can support follow-up, performance review, coaching, and future automation.
- Built related local SunrunOne CLI/API workflow tooling around authorized sessions for read-only profile/session checks, navigation mapping, retail store context, and appointment-availability exploration where access allowed.
- Created an MCP-style tool surface for AI-assisted workflow inspection while keeping public materials free of secrets, private endpoints, and customer data.
- Created a public portfolio case study with privacy-safe demo/redacted assets; not an official Sunrun product.

OpenClaw / Hermes AI Operator Workflows — Personal Systems Setup

- Worked with OpenClaw and Hermes-style agent orchestration to coordinate AI assistants, local/cloud model routing, Telegram workflows, tools, memory, and task execution.
- Explored practical routing between cloud models for reliability and local models for private, lower-cost, or offline-capable workflows.
- Designed AI workflow concepts around human-in-the-loop approvals, safe tool use, messaging workflows, and operational task routing.

Dental Practice Automation Workflow Research

- Researched workflow opportunities for dental practices including missed-call follow-up, new patient intake, appointment reminders, review requests, treatment follow-up, and

CRM-style status tracking.

- Mapped automation opportunities using n8n/Zapier/Make-style workflow thinking without presenting it as a completed client deployment.

EXPERIENCE

Administration / Dispatch Clerk — 702 Shuttles, San Ysidro

May 2025 – Aug 2025

- Oversaw daily operations for a high-volume intercity shuttle location, including ticket sales, dispatch coordination, and cash registry management.
- Delivered bilingual customer service across in-person, phone, and email channels.
- Used internal booking and route systems, Geotab vehicle tracking, CRM workflows, Gmail, JustCall, and Excel reporting.
- Prepared and reconciled passenger manifests, payment logs, commission tracking, cancellations, and operational reports.
- Monitored KPIs including ticket sales, cancellations, on-time departures, and customer service issues.
- Coordinated with regional offices for transfers, high-capacity days, exceptions, refunds, vouchers, and schedule integrity.

Youth Development Lead — Elevo Learning, San Diego

Apr 2023 – Jul 2025

- Led after-school sports and youth development programs with focus on safety, engagement, communication, and site-level execution.
- Supervised coaches and program staff, supported training, followed safety procedures, and communicated with students, parents, school administrators, and regional managers.

Door-to-Door Sales Representative — Spectrum, Miramar

Apr 2019 – Oct 2020

- Prospected residential customers through direct sales, needs analysis, product presentations, relationship building, and performance target execution.

Sales — AT&T, Miramar

Mar 2018 – Feb 2019

- Supported customer acquisition, consultative selling, service recommendations, and customer relationship building.

Digital Marketing / Account Support — Social Media Practices LLC, San Diego

Aug 2017 – Apr 2018

- Supported social media, content, account strategy, client communication, digital marketing analysis, and campaign coordination.

SKILLS

AI / Automation: AI workflow systems, OpenClaw, Hermes, CLI/API workflow tooling, MCP-style tool surfaces, local/cloud LLM routing, Telegram AI workflows, LLM integrations,

n8n/Zapier/Make concepts, human-in-the-loop automation.

Operations: Dispatch coordination, CRM workflows, sales operations, customer communication, KPI tracking, process documentation, workflow mapping.

Tools: Microsoft Excel, Microsoft Office, Gmail, JustCall, Geotab, internal booking systems, GitHub, Vercel, Next.js/Tailwind basics.

Languages: English, Spanish.
